PROFESSIONAL SUMMARY

Full-stack developer building scalable SaaS and real-time applications with Next.js, TypeScript, Node.js, MongoDB, and PostgreSQL. Hands-on experience with REST APIs, WebSockets, RAG, vector search, Docker, and cloud deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui, Zustand, Monaco Editor, TanStack

Backend & AI: Node.js, Express.js, FastAPI, REST APIs, RAG (Retrieval-Augmented Generation), Groq LLMs

Databases & Storage: MongoDB, PostgreSQL, Astra DB, Supabase Storage

Tools & Real-Time Technologies: Git, GitHub, Socket.IO, WebSockets, Yjs, Docker, Vercel, Render

PROJECTS

WebWeaver - Collaborative Web IDE | GitHub | Live Demo

- Built a browser-based collaborative Web IDE using Next.js, Monaco Editor, Zustand, and Yjs for real-time multi-user code editing.
- Implemented WebSocket-based synchronization and path-based file state management to support reliable editing across multi-file projects.
- Developed a Docker-based isolated preview service that dynamically builds and runs Next.js projects for live application previews.
- Integrated Supabase Storage for persistent project files and synchronization across stateless deployments.

Project Management SaaS | GitHub | Live Demo

- Built a full-stack Project Management SaaS with Next.js, TypeScript, Node.js, MongoDB, REST APIs, authentication, and role-based access control (RBAC).
- Developed an AI-powered RAG assistant using FastAPI, Astra DB Vector Search, and Groq LLMs for project-scoped task retrieval and natural-language Q&A.
- Implemented real-time collaboration with Socket.IO for messaging, task updates, assignments, and user notifications.
- Engineered task workflows with priorities, deadlines, status tracking, member assignments, file sharing, and project-level authorization.
- Deployed a distributed architecture across Vercel and Render with Supabase Storage and independently hosted Next.js, Socket.IO, and FastAPI services.

Real-Time Web Chat App | GitHub | Live Demo

- Built a real-time chat application using React, Node.js, Express.js, MongoDB, and Socket.IO with a responsive frontend and modular backend.
- Designed REST API communication and real-time event flows for low-latency messaging.

PROFESSIONAL EXPERIENCE

Bharat Intern | Jan 2023 - Mar 2023

- Built responsive web interfaces using HTML, CSS, and JavaScript and applied reusable frontend development practices.

EDUCATION

B.Tech in Computer Science - Uttarakhand Technical University || 2022—2026 || CGPA :: 7.2

Class XII: 78.2% | Class X: 79.6%

CERTIFICATIONS

JavaScript Algorithms and Data Structures - freeCodeCamp | HTML & CSS - freeCodeCamp
